#	Meeting Day	Product Owner		Software Developer	Release Manager	Scrum Master	Comment
		Review	Planning				
1	2025-04-16	both	both	all other	none	Felix	
2	2025-04-23	both	both	all other	Max	Felix	
3	2025-04-30			all other	Alex	Felix	
4	2025-05-07			all other	Jonas	Felix	Build process review
5	2025-05-14			all other	Lennard	Felix	
6	2025-05-21			all other	Lisabeth	Felix	
7	2025-05-28			all other	Tessa	Felix	Mid-term due
8	2025-06-04			all other	Maximilian	Felix	
9	2025-06-11			all other	Alexander	Felix	
10	2025-06-18			all other	Biranavan	Felix	
11	2025-06-25			all other	Aditi Vishwas	Felix	
12	2025-07-02			all other	Moaiaad	Felix	
13	2025-07-09			all other		Felix	
14	2025-07-16			all other		Felix	Demo day!
Product owners, software developers, and Scrum Master are set and ideally don't change over time; the critical part is the Release Manager role you need to define here							

Goals	Interpersonal relationship objectives: “To foster an atmosphere of mutual respect and learning, creating a team-spirit”
	Main goal is to create a satisfying project that makes Us, the IP(Industry Partner) and open-source community happy
Meeting norms	Documentation in english and meeting language in German
	Start on time
	Be Polite
	Purpose: Clearly define the goal of the meeting. Preparation: Ensure all participants are well-informed and ready to contribute. Participation: Encourage active engagement from all attendees. Process: Organize the meeting structure and agenda effectively. Progress: Monitor the meeting's progress and ensure it stays on track.
Working norms	Leave the code better than you found it (The Boy Scout Rule)
	Keep it Simple, Stupid (KISS)
Coordination norms	Felix will do the retros + keeping track of meetings
	Alex and Max will take care of the assignments (Backlog Items)
Communication norms	We check Discord at least every day
Consideration norms	Communicate Conflict in Team-Meeting. Help from Felix or Jovana to solve conflicts.
	Respect, active listening, tolerance
Cont. improvement norms	Experimentation spirit and feedback culture
	Burn-Down charts as process tracking
Rewards	Appreciation and praise
Sanctions	Wear the ducky tie
	Post a cute/funny pic of a pet (or similar)
Signatures	
Scrum Master	Felix Lang
Product owner	Maximilian Krug
Product owner	Alexander Lorenz
Software developer	Mohammad Moaiad Alhamdh Alsultan (Moaiad Alsultan)
Software developer	Jonas Brüggemann
Software developer	Lennard Clicqué
Software developer	Birnavan Parameswaran (Biri)
Software developer	Lisabeth Hasse
Software developer	Tessa Heidkamp
Software developer	Aditi Vishwas Takale

Product Vision	Project Mission
<p data-bbox="136 213 304 239">Product Vision</p> <p data-bbox="136 244 1111 300">We are transforming the landscape of software testing through intelligent, AI-powered automation.</p> <p data-bbox="136 331 1111 568">Our vision is a future where testing is no longer a bottleneck but a seamless, continuous, and reliable part of the development process. By empowering developers and testers with AI tools that autonomously generate and maintain test cases, we free them from generating the same test cases over and over to instead focus on creative problem-solving and strategic innovation. Our solution supports a future of scalable, secure, and locally controlled quality assurance, driving the next evolution in software development. We envision the role of the programmer to become a curator and innovator of AI generated Code.</p>	<p data-bbox="1126 213 1308 239">Product Mission</p> <p data-bbox="1126 244 2083 480">Deliver a minimum viable product (MVP) of an AI-powered test generation assistant that interacts effectively with real-world software projects. This includes laying the empirical and research groundwork for the idea. From this research we will conclude a MVP, that can analyze simple Python and C++ programs and produce corresponding test cases. Operated through a user-friendly chat interface. The MVP will showcase initial integration with widely used open-source testing frameworks such as Robot Framework, proving the viability of AI-assisted test automation in practical, everyday development environments.</p>

				5	Large size		
				8	Very large size		
				13	Too large (size)		
How to play planning poker							
1. Everyone type their number into their value field, don't hit return yet							
2. Someone, perhaps a product owner, count down 3.. 2.. 1..							
3. Then, everyone hit return to submit their value
